M 2 :- Practical-10

Roll No.:T017	Name: Radhika mali
Class:TYIT	Batch:1
Date of Assignment: 26-9-2026	Date/Time of Submission: 26-9-2026

Aim: Permission & Security Management

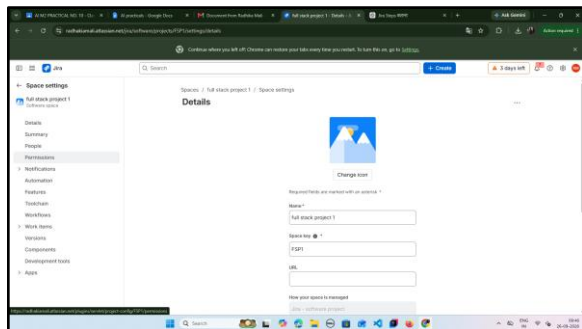

A. View and modify Project Permission Scheme.

Theory:

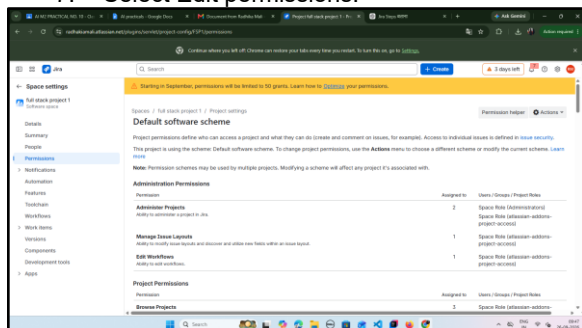

Project permissions control what users can do in a Jira project, such as viewing, creating, editing and managing work items. Permission schemes help administrators manage access and security.

Steps:

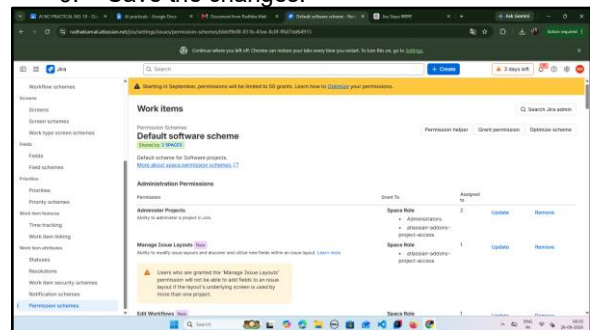

1. Open the required Jira Project/Space.
2. Click Space Settings.
3. Click Permissions.

4. View the existing Permission Scheme.
5. Check the permissions assigned to different users, groups or roles.
6. If modification is required, click Actions.
7. Select Edit permissions.

8. Modify the required permission.
9. Save the changes.

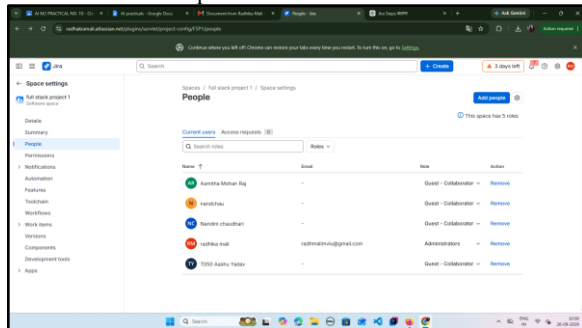

B. Configure Project Roles and assign permissions.

Theory

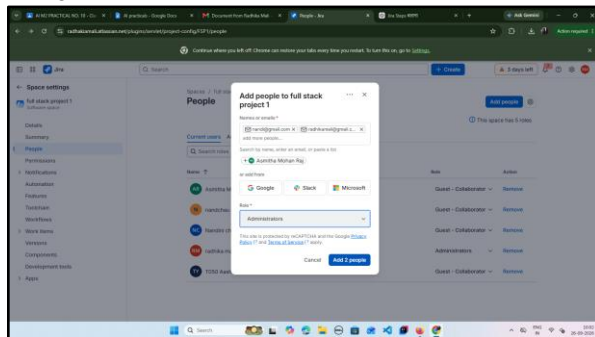

Project roles define the responsibilities of users in a Jira project. Users can be added to appropriate roles so that they receive the required permissions.

Steps

1. Open the required Jira Project/Space.
2. Click Space Settings.
3. Click People.

4. View the existing project users and their roles.
5. Click Add people.
6. Select the required users.
7. Select the required Role.
8. Click Add.

9. Verify that the new users are added with the selected role.
