M 2 :- Practical-7

Roll No.:T017	Name: Radhika mali
Class:TYIT	Batch:1
Date of Assignment: 12-9-2026	Date/Time of Submission: 12-9-2026

Aim: Kanban Board Management .

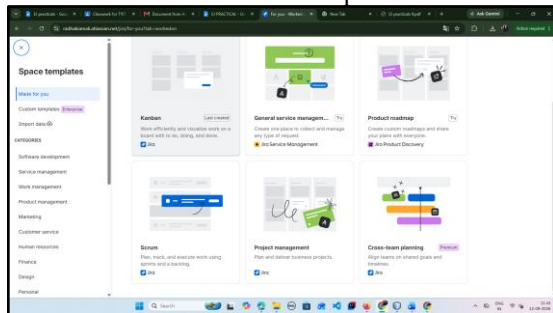

A: Create a Company-Managed Kanban Project .

Theory:

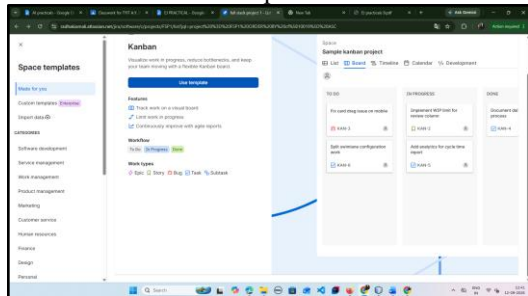

A Kanban Board is a visual project management tool used to track work through different stages. It helps the team visualize tasks and monitor their progress.

Steps:

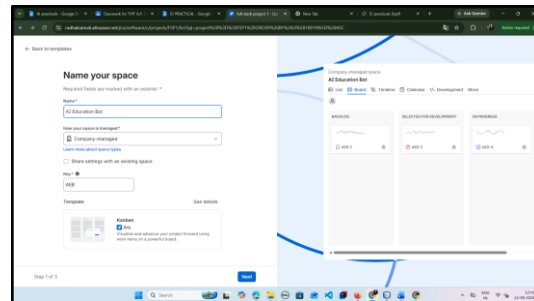

1. Go to Spaces → Create Space.
2. Select the Kanban template.

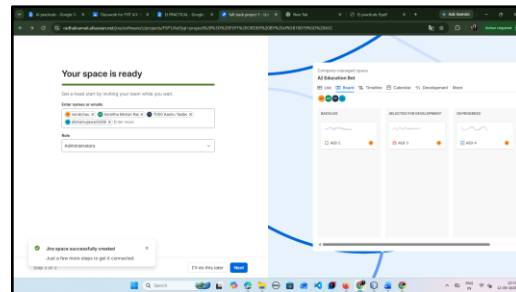

3. Click Use Template.

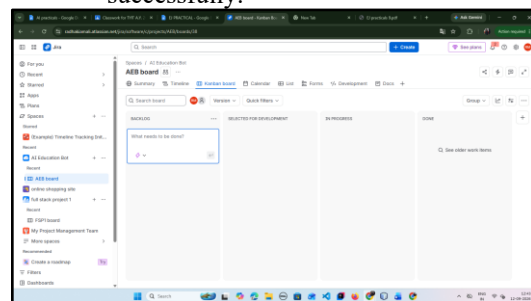

4. Enter the required details such as:
 - Space/Project Name: AI Education Bot
 - Select : Company-managed:
 - Project Key: AEB
5. Click Next.

6. Add the required Team Members.
7. Click Next.

8. The Kanban Board will be created successfully.

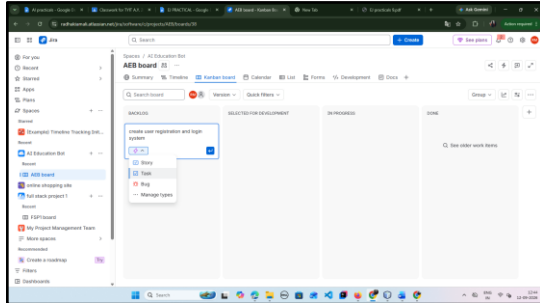

B. Configure Kanban Board .

Theory:

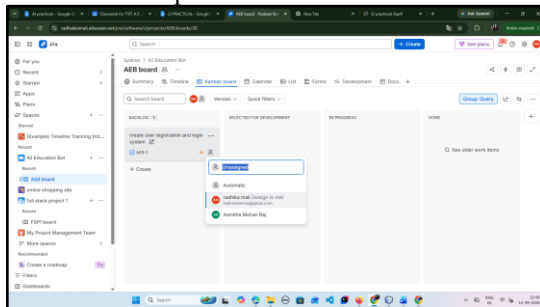

Kanban allows tasks to be organized and moved between different workflow stages. Tasks can be assigned to users, given priorities, and provided with due dates.

Steps**1. Create Backlog Task.**

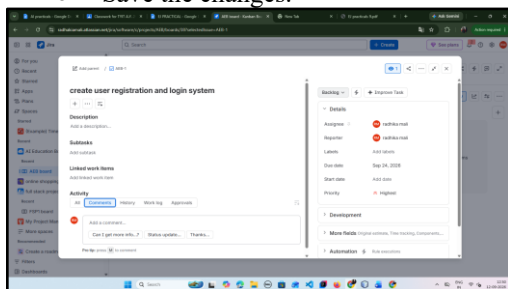

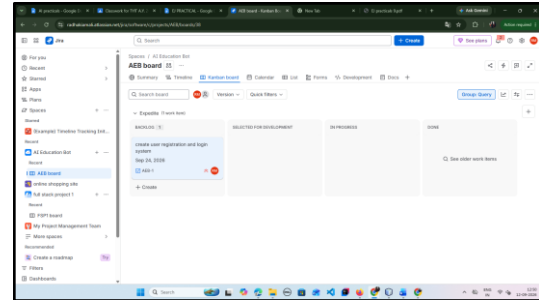

- Open the created Kanban Board.
- Create a new task in the backlog.
- Select Issue Type → Task.
- Enter the task details.
- Press Enter to create the task.

**2. Assign Task to User**

- Open the created task.
- Go to the Assignee field.
- Select the required user.
- Save/update the task.

**3. Set Priority and Due Date.**

- Open the task.
- Set the required Priority.
- Enter the Due Date.
- Save the changes.

**4. The Kanban Board will be created successfully.****C. Track Issue Progress and Generate Control Chart .****Theory:**

A Control Chart is a reporting tool in Jira used to visualize the time taken to complete issues. It helps in analyzing the workflow and tracking issue progress over time.

Steps:

1. Open Kanban Board.
2. Find your task.
3. Move it:

BACKLOG

SELECTED FOR DEVELOPMENT

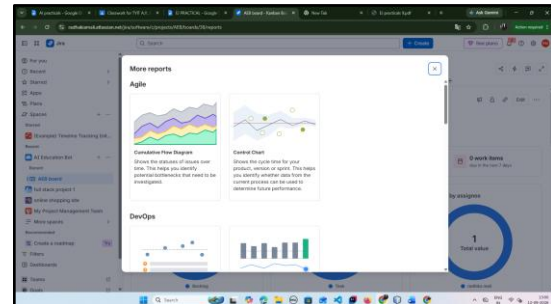

IN PROGRESS

DONE

4. Click Reports.
5. Go to Agile.
6. Click the Control Chart.

**7. Control Chart appears.**
