M 2 :- Practical-5

Roll No.:T017	Name: Radhika mali
Class:TYIT	Batch:1
Date of Assignment: 9-9-2026	Date/Time of Submission: 9-9-2026

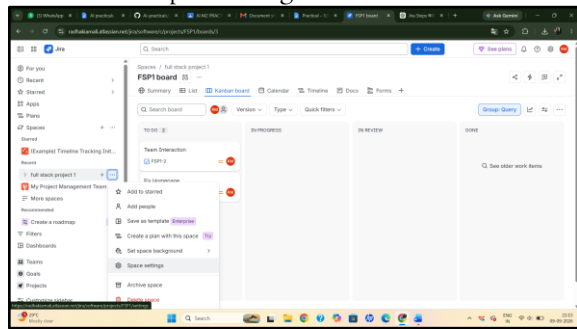

5A. Design a Custom Workflow.

Theory:

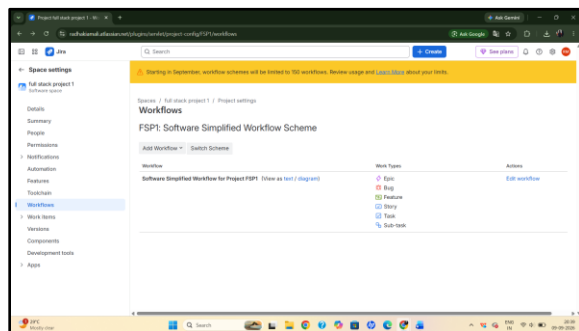

A workflow in Jira defines the different stages through which a work item moves. A custom workflow can be created by adding an existing workflow and selecting the required issue types.

Steps:

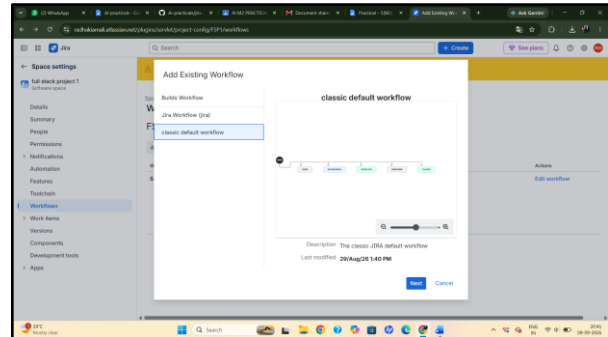

1. Open Jira → Open your Project/Space.
2. Go to Space Settings → Workflows.

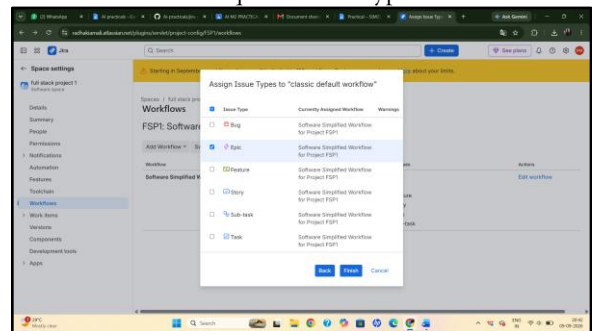

3. Click Add Workflow → Add Existing Workflow.

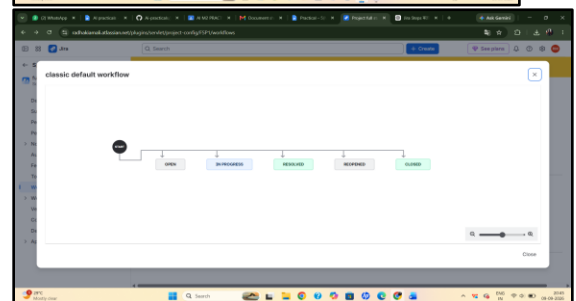

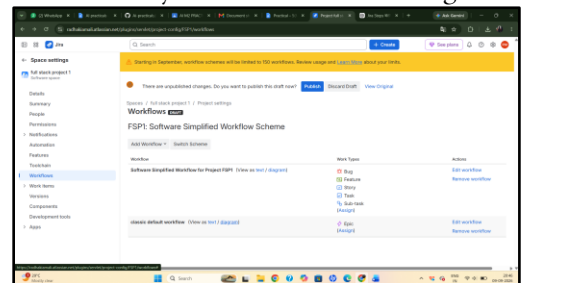

4. Select Classic Default Workflow → Click Next.

5. Select the required Issue Types → Click Finish.

6. Find your workflow → Click Diagram.

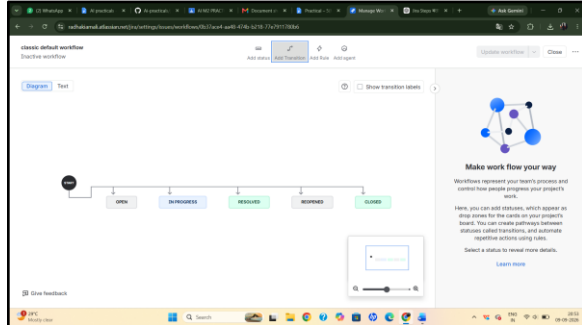

5B. Add Transitions and Conditions.

Theory:

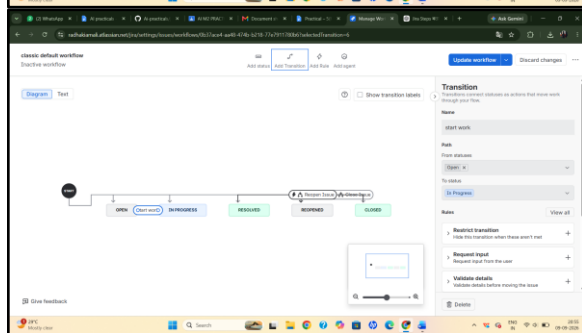

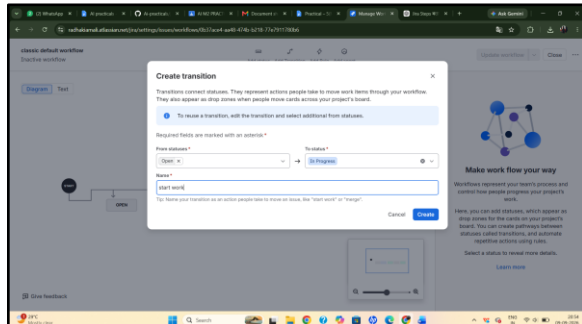

Transitions in Jira are used to move a work item from one status to another, such as To Do → In Progress. Conditions can be added to control when a transition can be performed.

Steps:

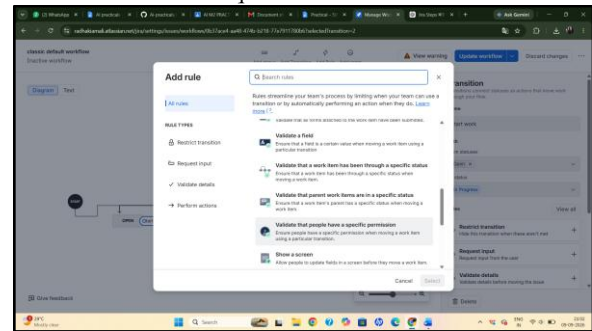

1. Open Space Settings → Workflows.
2. Select your workflow → Click Edit Workflow.
3. Click Add Transition.

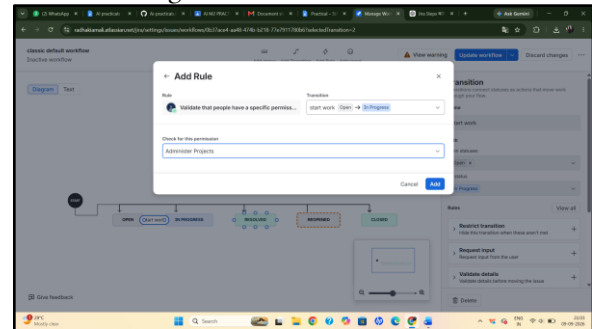

4. Select From: To Do → To: In Progress.
5. Enter transition name: Start Work.
6. Click Create.

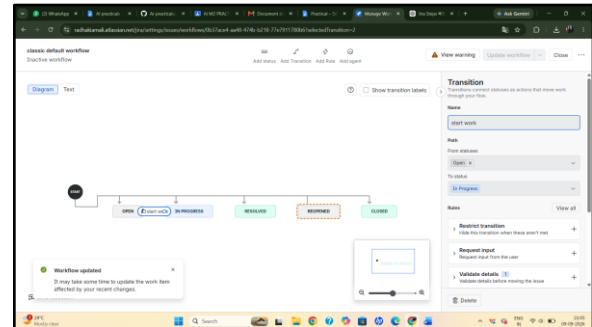

7. Select the created transition.
8. Click Add Rule.
9. Select the required condition → Click Select.

10. Configure the condition → Click Add.

11. Click Update Workflow.
12. Click Close.

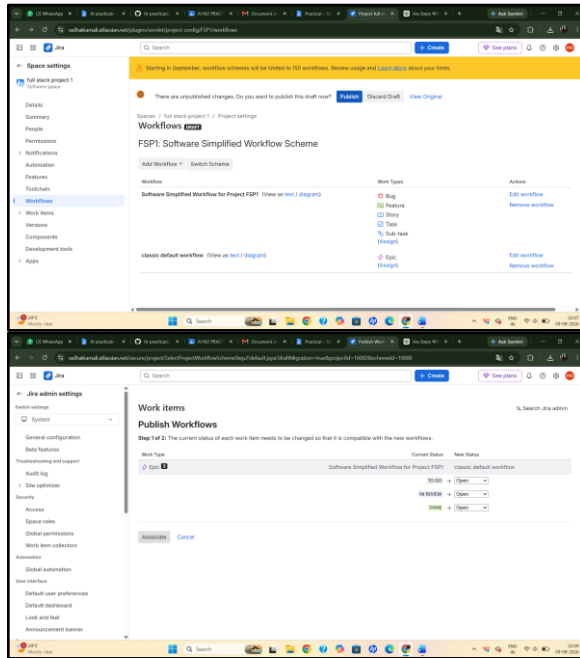

5C. Publish and Associate Workflow.

Theory:

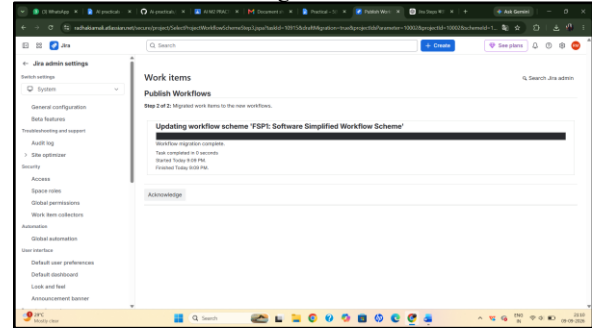

After creating and modifying a workflow, it must be published and associated with a project so that the project can use the new workflow.

Steps:

1. Click Publish.
2. Confirm the workflow publication.
3. Click Associate.

4. Select your Project.
5. Update the Workflow Scheme.
6. Wait for the update to complete.
7. Click Acknowledge.

8. Open your project and verify the workflow.
